

BYRNA KINETIC PROJECTILES

Byrna Kinetic Projectiles are made from a hard solid nylon polymer and are used to stop an attacker with pain compliance. Due to the pain factor, people shot with a kinetic projectile think they have been shot with a firearm.

ADVANCED FEATURES:

- **Does not shatter on impact**
- **Available in 95 counts**
- **Size: 0.68cal (17mm)**
- **Weight: 0.1 oz. (3 gram)**
- **Color: Solid Gray**
- **Blunt Force Projectile**
