

darc6™

The lightest, purpose-built, no compromise, production ultralight survival carbine just got better. At only **4.3 pounds** and chambered to shoot full-powered Mil-Spec 5.56 NATO ammunition, this featherweight champion just got better with newly improved components! It took years in R&D, engineering and multiple US Patents to create the most robust and reliable lightweight AR platform on the market. Building something that is not only lightweight but all the while not sacrificing strength and performance is the ultimate secret of the **BATTLEARMS® OIP®**. Every component, shy of a few detents and springs, are custom built and designed to work together as a complete system. No, you will not find a parts gun here. Every part is uniquely **Battle Arms Development, Inc®**.

dARC6 OIP® 6MM ARC 12.5" VERT® PDW

Weight (Empty):	5 lbs 4 ozs (2.4 kg)
Overall Length:	28-1/4" 717.55 mm
